digiMine™ SERVICES

Overview

Building a comprehensive data warehouse is the first fundamental step in creating strong analytics and personalization. digiMine will take your data from multiple sources including click stream, transaction, product, campaign and user profiles to create a robust data asset.

Our scalable data warehousing infrastructure enables us to build large warehouses that are capable of holding data for the most data intensive businesses, even those as big as the Media Metrix top 50.

digiMineSM SERVICES

Overview

digiMine(SM) Data Enhancement Services are helpful tools that make your data more valuable and more usable. These services can also help you reduce marketing costs by correcting addresses and eliminating duplicates.

digiMine(SM) Address Validation/Correction - digiMine can validate and correct customer addresses using information from the USPS. digiMine's address validation and correction services include: National Change of Address (NCOA), Locatable Address Correction Service (LACS) and Delivery Sequence File (DSF) processing.*

digiMine(SM) Merge/Purge - digiMine can also merge lists and purge duplicates. This service enables you to eliminate duplicate records and records that map to the same address (householding).

* NCOA, LACS and DSF are trademarks of the United States Postal Service

[digiMine SERVICES](#)

Service Benefits

digiMine(SM) Services make understanding your customers and your business easy. And we alleviate the frustrations associated with deploying and using a home-grown data warehousing and data mining solution.

Powerful data mining tools
Our data mining-powered reports provide you with unparalleled intelligence. We give you the tools to enable personalization that precisely targets content and maximizes up-sell and cross-sell opportunities.

Easy to use
digiMine(SM) Reporting Services are intuitive and organized to deliver relevant insight instantly. Our interactive reports allow you to customize the view of your analytics.

A comprehensive data asset
digiMine builds a robust, scalable and secure data warehouse for you that combines the full range of clickstream, user-registration, product, campaign and transaction data.

Quick to deploy
digiMine offers fast time-to-deployment. In fact, a typical installation allows us to setup and begin daily reporting within a few days. In many cases, customers begin to realize the value of digiMine(SM) Services in as little as 24 hours.

Affordable
Our web-based ASP model allows us to deliver a powerful, high-end service that is both efficient and affordable. Setup costs are minimal and do not require additional IT resources. A monthly fee covers all expenses related to hardware, software, operations and reporting.

Unlock the Power of Your Data

Overview

If you're like most businesses, you are generating huge volumes of valuable data - data that can reveal the likes and dislikes of current and potential customers about your products, services and web site. Do you have the infrastructure and tools in place to turn your data into actionable business intelligence?

digiMine, Inc. is setting new standards in the delivery of powerful analytics and personalization for eBusinesses. Our data mining services provide you with intuitive reports to understand customer behavior, marketing campaign effectiveness, sales trends, browse-to-buy conversion, customer segment identification and much more. digiMine's data mining services also deliver predictive applications that give you the ability to personalize web content, cross-sell and up-sell.

digiMine is the only true ASP (application service provider) for sophisticated data warehousing and data mining solutions. We go far beyond today's web-reporting packages by building a comprehensive data warehouse and by applying data mining tools to the full range of click stream, user registration, product catalog, campaign and transaction data. And our ASP model enables us to provide you with an affordable solution that is quick to deploy and easy to use.

Service Benefits

Powerful data mining tools

Our data mining powered reports provide you with unparalleled intelligence. We give you the tools you need to enable personalization that precisely targets content and maximizes up-sell and cross sell opportunities.

Comprehensive data asset

We take your multiple sources of data and build a robust data warehouse for you - a fundamental step in extracting the greatest value from your data. Our scalable data warehousing infrastructure enables us to build customer specific warehouses that are capable of holding data for the most data intensive businesses.

*digiMine, Inc.'s reports
provide actionable insight
into customer behavior.*

Take the Quiz *Do you know enough about your customers?*

1. How many customers came to your site yesterday?
2. How many were first time visitors?
3. Can you get a list of those new customers and send them a personalized thank you the next day?
4. What are the top 10 most visited product areas on your site?
5. What products should you consider making "loss leaders" to attract new customers?
6. What are your top ten selling products or services? Have they changed in the last month?
7. How many shoppers go through your homepage per session?
8. Which marketing promotions are most effective at driving new customers to your site?
9. Which customers are likely to "churn" and which are loyal shoppers on your site?
10. What is the expected "lifetime value" of your customer?

How many of these questions can you answer today? You're not alone if you can only answer a few. With digiMine, you will be able to answer these questions and more.

Fig 19I

Affordable

Our web-based ASP model allows us to deliver a powerful, high-end service that is efficient and affordable. Set-up costs are minimal and do not require additional IT resources. Fixed monthly fees cover all expenses related to hardware, software, operations and reporting.

Easy-to-use

digIMineSM Reporting Services are intuitive and organized to deliver relevant insight instantly. Our interactive reports allow you to customize your view of your analytics. And you don't have to be a statistician to understand your data.

Quick to deploy

digIMine offers the fastest time to deployment. In fact, a typical installation allows us to setup and begin daily reporting within a few days. In many cases, our customers have full analytics in less than 24 hours.

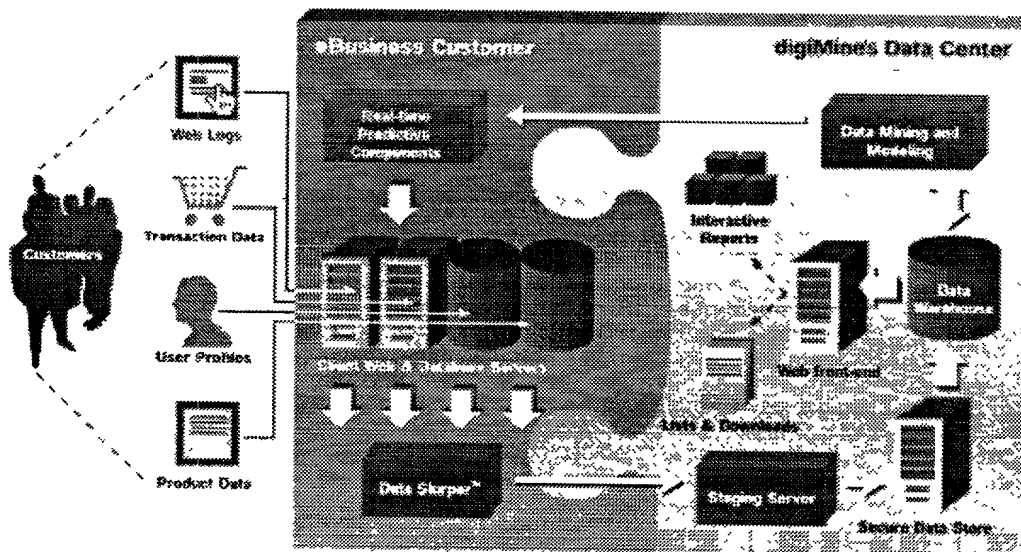

How digIMine Works

digIMineSM Services do not require you to invest in additional IT resources, nor do we require you to deploy data tags. We simply install a digIMine SlurperTM at your data center that encrypts and compresses your data for transmission at pre-determined times. digIMine's SlurperTM is a simple piece of software that has the ability to pull web server logs and gather data from any OLE-DB-compliant database - from Oracle, SQL, DB2 and others. This process does not compromise your network security or require you to open your firewall.

Once your data is transferred to digIMine's data center, it is parsed, cleaned and loaded into a secure data warehouse.

digIMine then produces detailed and accurate reports that are delivered 24 hours a day, 7 days a week, 365 days a year. You can access your reports through a dedicated https connection using a standard browser. The reports are completely secure and require user authentication. In fact, as an administrator, you have the ability to set various levels of access permission for different business users in your company. Your data is also made available for export.

digIMine provides data mining services for predictive applications. These predictive components give you the ability to personalize web content and cross-sell or up-sell products. Data mining components run in real-time on your web site or in batch applications, such as targeted e-mail.

digiMineSM SERVICES

Take the Quiz

With the abundance of sites on the Internet today, it's hard to get customers and keep them. Let's face it, if within 20 seconds your visitors are not presented with the specific content or list of products they're interested in, then there's little chance they'll return again.

How many of these questions can you answer today? You're not alone if you can only answer a few. With digiMine, you will be able to answer all of these questions and more.

- How many customers came to your site yesterday?
- How many were first time visitors?
- Can you get a list of those new customers and send them a thank you the next day?
- What are most visited products areas on your site?
- What products should you consider making "loss leaders" to attract new customers?
- What are your top selling products or services? Have they changed in the last month?
- How many shoppers go through your home page?
- Which marketing promotions are most effective at driving new customers to your site?
- Which customers are likely to "churn" and which are loyal shoppers on your site?
- What is the expected "life time value" of your customers?

digiMine SERVICES

How digiMine Works

digiMine Services do not require any additional investment in IT resources, nor do we require you to deploy data tags. We simply install a digiMine Data Slurper™ at your data center that encrypts and compresses your data for transmission at predetermined times. digiMine's Data Slurper™ is a simple software application that has the ability to pull web server logs and gather data from any commercial database such as Oracle, SQL, DB2 and others. This process does not compromise your network security or require you to open your firewall. Alternatively, you can also send your data to us through a secure FTP transfer.

Once your data is transferred to digiMine's data center, it is parsed, cleaned and loaded into a secure data warehouse. We can also merge, purge, validate and correct your data.

We then apply data mining to produce insightful analytics. These analytics are generated and delivered to you through interactive reports and downloadable lists that are available 24 hours a day, 365 days a year. You can access your reports through a dedicated and secure connection using a standard browser.

Real-time data mining components (executables called from java or asp) are run independently of the digiMine data center to avoid any impact on site performance. These can be run in real-time on your web site or in batch applications such as targeted email.

digiMine's Data Slurper™ is a simple software application that has the ability to pull web server logs and gather data from any commercial database such as Oracle, SQL, DB2 and others. This process does not compromise your network security or require you to open your firewall. Alternatively, you can also send your data to us through a secure FTP transfer.

COMPANY

Our Mission

digiMine works on is to increase the value of e-businesses by making data warehousing and data mining a competitive reality.

digiMine was born from the experience of our three founders, Nick Besbeas, Usama Fayyad and Bassel Ojeh. All three Microsoft veterans come from different disciplines — direct marketing, data mining, and data warehouse operations.

Through their experiences, they realized that the benefits of data warehousing and data mining delivered as a service, would enable e-businesses to derive the most value from their data for increased competitive advantage.

Management

**Bob Bolan, Esq.**

Vice President of Legal Affairs
Bob@digiMine.com

[« previous bio](#)[management home](#)

Bob Bolan is chief legal counsel and advises the management team and the board of directors on all legal affairs of the company.

From 1994 until joining the company in May of 2000, Bob served as Corporate Attorney at Microsoft Corporation where he practiced in a wide variety of corporate matters including intellectual property, licensing, litigation, acquisitions, strategic alliances and investments. He provided legal services to the Windows Platform Division, the Applications Division, the Microsoft Network, and Microsoft Research Division. Most notably, Bob led the development of the patent portfolio for Microsoft Research in Redmond, Cambridge and China, representing such diverse technologies as speech recognition, natural languages, operating systems, programming languages, cryptography, user interface design, artificial intelligence, graphics, vision, development tools, database and data mining.

From 1988 to 1994, Bob was a Member of Technical Staff at AT&T Bell Laboratories where he developed network features for high-capacity packet switches that formed the signaling infrastructure of the AT&T interexchange carrier network.

Bob received his J.D. from Capital University (1993) and was honored with membership to Order of the Coif. He also earned a Masters in Computer Science from Purdue (1988) and an Honors Bachelor of Arts in Classical Languages from Xavier University (1978). Bob is a member of the Washington State Bar, the Ohio Bar and is registered to practice before the US Patent and Trademark Office. He is a former extern of Judge James Graham of the United States District Court, Southern District of Ohio, and of Judge Alan Norris of the Sixth Circuit Court of Appeals.

Careers

Join us in a Great New Workplace

Welcome to digiMine. We're a young, well-funded company with huge potential. Our founders are industry visionaries with a wealth of marketing, product development and research experience. They have held leadership positions at Microsoft and NASA where they have built and managed dynamic, successful organizations. We also have an equally impressive roster of investors backing us.

At digiMine, you'll have the chance to spread your entrepreneurial wings and soar. Along the way, you'll use your skills and knowledge to help digiMine reach new heights. In return for your hard work, you'll enjoy an industry-leading compensation package that includes stock options. So you can tie your financial success to your achievements at the company.

digiMine is a passionate group of people. We're passionate about creating revolutionary data mining and data warehousing technologies. We're passionate about delivering great customer service. We're passionate about winning. And we're passionate about building a workplace where you'll have many opportunities to contribute to our success and receive generous rewards for your hard work.

Check out our career opportunities and see why one Silicon Valley angel investor called us "the hottest startup ever to come out of Seattle."
